EDUCATION

Virginia Tech <i>Bsc. Electrical Engineering, Micro/Nano Systems</i> - Dean's List with Distinction - Courses: Analog IC Design, VLSI Circuit Design, RF and Microwave, Analog Electronics	Blacksburg, VA Aug 2023 – May 2027
--	---------------------------------------

AWARDS

Open Sauce Technology and Creator Festival 2026 Exhibitor <i>San Francisco</i>	July 2026
Modine Data Center Hackathon - 2nd Place <i>Issued by Modine Manufacturing</i>	April 2026
AMP Lab x VPT Inc. Hardware Design Competition - 3rd Place <i>Issued by VPT Inc.</i>	March 2026
Honda Innovation Award <i>Issued by Honda at National Robotics Challenge</i>	April 2025
Additive Manufacturing Gold Award <i>Issued by National Robotics Challenge</i>	April 2025

SKILLS

LTSpice, ngspice, Sky130, PCB Design KiCAD, Altium, Keysight ADS, C/C++, Python, MATLAB, Linux, Git, Bash

EXPERIENCE

2x Electrical Engineering Intern <i>MPR Associates, Inc.</i> - Prepared 3 client-facing engineering reports: ampacity calculations for Battery Energy Storage Systems; procedure updates for EDG excitation systems to ensure proper voltage response; technical assessment of replacing electromechanical relays with microprocessor-based multifunction relays - Automated grid modernization tasks using Python (JSON parsing), executed 30+ contingency and load redirection scenarios across a 70 sq. mile power grid using ETAP, added 150+ circuit to existing grid model	Summer 2025 and Summer 2026 Alexandria, VA
--	---

PROJECTS

Shift Register Daisy-Chained PCB <i>KiCAD, Digital Circuit Design</i> Developed a daisy-chained shift register PCB to enable modular, scalable peripheral sensing across VT CRO's 3D printing farm	Nov 2025
850 MHz Power Amplifier Transistor PCB Design <i>KiCAD, Keysight ADS</i> Designed a Class AB power amplifier using a Cree CGHV35150 transistor at 850 MHz in Keysight ADS. Implemented transmission-line and stub-based matching networks achieving $P_{1dB} > 20$ W and PAE $> 25\%$. Designed a two-layer FR4 PCB in KiCad. Created custom footprints for the transistor.	Nov 2025

LEADERSHIP

Semiconductor Student Alliance at Virginia Tech <i>President and Founder</i> Founded VT's first semiconductor based student organization, with 50+ members and 6 officers. SSA organized and hosted the Fall 2026 transistor hardware hackathon, SSA Semiconductor Summer School, 2 PCB workflow lab sessions, 4+ ECE 2214 exam review sessions.	Sep 2025 – Present
Competitive Robotics Organization at Virginia Tech <i>Electrical Engineer</i> The WorkCell is an autonomous 3D printing farm able to swap and store build plates on two 3D printers to print without supervision. Used by 140+ engineering students through a custom website. Competed at the National Robotics Challenge and presented at VT's Robotics Expo, and ECE Annual Banquet.	Sep 2024 – Present
Women in Electrical and Computer Engineering at Virginia Tech <i>Vice President</i>	May 2024 – Present
Institute of Electrical and Computer Engineers at Virginia Tech <i>Mentor Chair</i>	May 2024 – Present

CERTIFICATES

Linux: Bash Shell and Scripts <i>LinkedIn</i>	Jan 2026
Altium Education PCB Basic Design Course <i>Altium</i>	Jan 2026
